12	13111	Urban, Boomers, Female, Low Income, Single	1%	1%	127

**Consumer Vectors** – is a comprehensive consumer segmentation system that groups all US consumers into unique demographic segments, providing marketers with a powerful and effective way to understand and engage with their target audience.

**Consumer Vectors** – uses the most robust and significant demographics – age, income, gender, household type and geography – to create insightful consumer composites

Consumer Vectors Segment	Consumer Vectors Segment Description
--------------------------	--------------------------------------

Age	Millennials, Gen X, Baby Boomers, Greatest Generation
Income	High, Upper Middle, Middle, Low
Household Type	Single, Couples, Couples with Children
Geography	Urban, Suburban, Rural
Gender	Female, Male

### Use Consumer Vectors to:

- Build profitable relationships with your customers
- Create meaningful interactions within real-time digital environments
- Optimize your customer dialogues
- Maintain consistency in messaging across all channels
